## प्रस्तावना

व्यापक वार्षिक मॉड्यूलर सर्वेक्षण (सीएएमएस) राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एनएसएसओ) सांख्यिकी और कार्यक्रम कार्यान्वयन मंत्रालय (सां.कार्य.कार्या.मंत्रा) द्वारा जुलाई, 2022 - जून, 2023 के दौरान एनएसएस 79वें दौर के एक भाग के रूप में आयोजित किया गया था। सां.कार्य.कार्या.मंत्रा को विभिन्न मंत्रालयों/विभागों से निरंतर आधार पर परिवारों से संबंधित सामाजिक-आर्थिक स्तर पर डेटा/संकेतक तैयार करने के लिए विभिन्न विषयों पर कई अनुरोध प्राप्त हुए हैं। संबंधित मंत्रालयों/विभागों की आवश्यकताओं को पूरा करने के लिए, सीएएमएस की अवधारणा बनाई गई थी। सीएएमएस में शिक्षा, स्वास्थ्य, मोबाइल इंटरनेटआदि से संबंधित महत्वपूर्ण सूचना एकत्र की गई।

'व्यापक वार्षिक मॉड्यूलर सर्वेक्षण, 2022-23' शीर्षक वाली रिपोर्ट में प्रस्तुत किए गए सभी अनुमान जुलाई, 2022-जून, 2023 के दौरान सीएएमएस अनुसूची के माध्यम से एकत्र किए गए केंद्रीय प्रतिदर्श डेटा पर आधारित हैं। रिपोर्ट में 'सर्वेक्षण निष्कर्ष' नामक एक अध्याय और इस रिपोर्ट के आधार को बनाने वाली विस्तृत तालिकाओं सहित चार परिशिष्ट शामिल हैं।

राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय के घरेलू सर्वेक्षण प्रभाग (एचएसडी), जिसे पूर्व में सर्वेक्षण अभिकल्प और अनुसंधान प्रभाग (एसडीआरडी) कहा जाता था, ने सर्वेक्षण पद्धति का विकास और इस रिपोर्ट की तैयारी का कार्य किया। फील्ड वर्क क्षेत्र संकार्य प्रभाग (एफओडी) द्वारा किया गया, जबकि डेटा प्रोसेसिंग और सारणीकरण कार्य उद्यम सर्वेक्षण प्रभाग (ईएनएसडी), जिसे पूर्व में समंक विधायन प्रभाग (डीपीडी) कहा जाता था, द्वारा किया गया। समन्वय और गुणवत्ता नियंत्रण प्रभाग (सीक्यूसीडी), जिसे पूर्व में सर्वेक्षण समन्वय प्रभाग (एससीडी) कहा जाता था, ने सर्वेक्षण से संबंधित विभिन्न गतिविधियों का समन्वय किया।

मैं एनएसएस के 79वें दौर के कार्य समूह और राष्ट्रीय सांख्यिकी आयोग के अध्यक्ष और सदस्यों का सर्वेक्षण के विभिन्न चरणों में उनके बहुमूल्य मार्गदर्शन के लिए अत्यंत आभारी हूं। मैं इस रिपोर्ट को तैयार करने के लिए एनएसएसओ के विभिन्नप्रभागों के अधिकारियों द्वारा किए गए कार्य की भी प्रशंसा करती हूं। मुझे आशा है कि यह रिपोर्ट विभिन्न हितधारकों द्वारा उपयोगी पाई जाएगी।

## Preface

The Comprehensive Annual Modular Survey (CAMS) was conducted by the National Sample Survey Office (NSSO), M/o Statistics and Programme Implementation (M/oSPI) during July, 2022 – June, 2023 as a part of NSS 79<sup>th</sup> round. A number of requests on various subjects have been received by M/oSPI from different line ministries/ departments for generation of data/indicators on socio-economic variables related to households on a continuous basis. To cater to the requirements of line ministries/departments, the Comprehensive Annual Modular Survey (CAMS) was conceptualized. In CAMS, important information related to education, health, mobile internet etc. was collected.

All the estimates presented in the report titled ‘Comprehensive Annual Modular Survey, 2022-23’ are based on the central sample data collected through the CAMS Schedule during July, 2022 – June, 2023. The report contains a Chapter entitled ‘Survey *Findings*’ and four Appendices including the detailed tables forming the basis of this report.

The Household Survey Division (HSD), erstwhile Survey Design and Research Division (SDRD) of NSSO undertook the development of the survey methodology and the preparation of this report. The fieldwork was carried out by the Field Operations Division (FOD) while the data processing and tabulation work was done by the Enterprise Survey Division (EnSD), erstwhile Data Processing Division (DPD). The Coordination and Quality Control Division (C&QCD), erstwhile Survey Coordination Division (SCD) coordinated various activities pertaining to the survey.

I am extremely grateful to the Chair and members of the Working Group of NSS 79<sup>th</sup> round and the National Statistical Commission for their valuable guidance provided at various stages of the survey. I also place on record the commendable efforts made by officers of different Divisions of the NSSO for the preparation of this report. I hope this report will be found useful by various stakeholders.

A handwritten signature in blue ink, appearing to read "Geeta Singh Rathore".

## मुख्यबातें

यह रिपोर्ट जुलाई, 2022 - जून, 2023 के दौरान आयोजित एनएसएस 79वें दौर के Comprehensive Annual Modular Survey (CAMS), 2022-23 पर आधारित है। केंद्रीय प्रतिदर्श के लिए, सर्वेक्षण 15,298 प्रथम-चरण इकाइयों अर्थात् ग्रामीण क्षेत्रों में गांव और शहरी क्षेत्रों में शहरी ब्लॉक (ग्रामीण क्षेत्रों में 8,758 और शहरी क्षेत्रों में 6,540) में फैला हुआ था, जिसमें 3,02,086 परिवार (ग्रामीण क्षेत्रों में 1,73,096 और शहरी क्षेत्रों में 1,28,990) शामिल थे।

### प्रमुख निष्कर्ष

01

सर्वेक्षण की तिथि तक, 15-24 वर्ष की आयु के व्यक्तियों में से लगभग 97.8 प्रतिशत पुरुष और 95.9 प्रतिशत महिलाएं अपने रोजमर्रा के जीवन में समझ के साथ छोटे एवं सरल बयानों को पढ़ने और लिखने में सक्षम हैं तथा सरल अंकगणितीय गणना करने में भी सक्षम हैं।

कथन 2

02

15 वर्ष और उससे अधिक आयु के व्यक्तियों के लिए औपचारिक शिक्षा में स्कूली शिक्षा के औसत वर्ष 8.4 अनुमानित हैं। और 25 वर्ष और उससे अधिक आयु के व्यक्तियों के लिए स्कूली शिक्षा के औसत वर्ष 7.5 है।

आकृति 3.1 और 3.2

03

6 से 10 वर्ष की आयु वर्ग के व्यक्तियों में से, ग्रामीण क्षेत्रों में लगभग 90.5 प्रतिशत तथा शहरी क्षेत्रों में 89.2 प्रतिशत वर्तमान में प्राथमिक शिक्षा में नामांकित हैं।

आकृति 4.1

04

शहरी क्षेत्रों में 25 वर्ष या उससे अधिक आयु वर्ग में लगभग 56.6 प्रतिशत लोग माध्यमिक या उच्च शिक्षा प्राप्त हैं, जबकि ग्रामीण क्षेत्रों में यह अनुमान लगभग 30.4 प्रतिशत है।

आकृति 5.1

05

पिछले 365 दिनों के दौरान अस्पताल में भर्ती होने पर प्रति परिवार औसत आउट-ऑफ-पॉकेट चिकित्सा व्यय ग्रामीण क्षेत्रों में 4,129/- रुपये और शहरी क्षेत्रों में 5,290/- रुपये है, जबकि पिछले 30 दिनों के दौरान गैर-अस्पताल में भर्ती होने पर प्रति परिवार औसत आउट-ऑफ-पॉकेट चिकित्सा व्यय ग्रामीण क्षेत्रों में 539/- रुपये और शहरी क्षेत्रों में 606/- रुपये है।

आकृति 11.1 और 11.2

06

अखिल भारतीय स्तर पर, 18 वर्ष और उससे अधिक आयु वर्ग में, लगभग 94.6 प्रतिशत व्यक्तियों का किसी बैंक/अन्य वित्तीय संस्थान या मोबाइल मनी सेवा प्रदाता के पास व्यक्तिगत या संयुक्त रूप से खाता है। इसी आयु वर्ग में, ग्रामीण क्षेत्रों में यह अँकड़ा लगभग 94.6 प्रतिशत और शहरी क्षेत्रों में 94.4 प्रतिशत है।

आकृति 12.1

07

15-24 वर्ष की आयु के व्यक्तियों में से लगभग 78.4 प्रतिशत ने 'फाइलें (जैसे, दस्तावेज, चित्र, वीडियो) संलग्न करके संदेश भेजने (जैसे, ई-मेल, संदेश सेवा, एसएमएस)' कौशल के क्रियान्वयन की सूचना दी। इसी आयु वर्ग में, लगभग 83.6 प्रतिशत पुरुषों और 72.7 प्रतिशत महिलाओं ने सर्वेक्षण की तारीख से पहले पिछले तीन महीनों के दौरान यह कौशल के क्रियान्वयन की सूचना दी।

कथन 7

08

लगभग 94.2 प्रतिशत ग्रामीण परिवारों और लगभग 97.1 प्रतिशत शहरी परिवारों के पास टेलीफोन और/या मोबाइल फोन हैं।

आकृति 20.1

09

लगभग 93.7 प्रतिशत शहरी आबादी को अपने निवास स्थान से 500 मीटर के भीतर कम क्षमता वाले सार्वजनिक परिवहन की सुविधा उपलब्ध है।

आकृति 21.1

## Highlights

The report is based on the Comprehensive Annual Modular Survey (CAMS), 2022-23 of the NSS 79<sup>th</sup> round conducted during July, 2022 - June, 2023. For the central sample, the survey was spread over 15,298 first-stage units i.e. villages in rural areas and urban blocks in urban areas (8,758 in rural areas and 6,540 in urban areas) covering 3,02,086 households (1,73,096 in rural areas and 1,28,990 in urban areas).

### Key findings

**01**

Among the persons aged 15-24 years, around 97.8 percent of males and 95.9 percent of females are able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations as on date of the survey.

Statement 2

**02**

Among persons aged 15 years and above, the mean years of schooling in formal education is estimated as 8.4. For those aged 25 years and above, the mean years of schooling is 7.5.

Figures 3.1 and 3.2

**03**

Among persons of age group 6 to 10 years, about 90.5 percent in rural areas and 89.2 percent in urban areas are currently enrolled in primary education.

Figure 4.1

**04**

In urban areas, approximately 56.6 percent persons of age 25 years and above are with some secondary education. Whereas, in rural areas, it is estimated around 30.4 percent.

Figure 5.1

**05**

The average out-of-pocket medical expenditure per household on hospitalization during last 365 days is Rs 4,129/- in rural areas and Rs 5,290/- in urban areas whereas the average out-of-pocket medical expenditure per household on non-hospitalization during last 30 days is Rs 539/- in rural areas

Figure 11.1 and 11.2

**06**

Around 94.6 percent of persons, aged 18 years and above, have an account individually or jointly in any bank/other financial institution or with mobile money service provider at all-India level. In the same age group, the figure stands around 94.6 percent in rural areas and 94.4 percent in urban areas.

Figures 12.1

**07**

Among the persons aged 15-24 years, around 78.4 percent reported execution of skill of ‘sending messages (e.g., e-mail, messaging service, SMS) with attached files (e.g., documents, pictures, video)’. In the same age group, around 83.6 percent of males and 72.7 percent of females reported execution of the above skill during last three months preceding the date of survey

Statement 7

**08**

About 94.2 percent of rural households and about 97.1 percent of urban households possess telephone and/or mobile phone.

Figure 20.1

**09**

Around 93.7 percent of the urban population has convenient access to low-capacity public transport within 500 meters from the place of living.

Figure 21.1

## **Survey Findings**

# Survey Findings

## 1 Introduction

National Sample Survey Office (NSSO) conducted the ‘Comprehensive Annual Modular Survey’ (CAMS) in its 79th round (July, 2022 to June, 2023). The primary objective of CAMS was to collect data to generate indicators encompassing education, out-of-pocket medical expenditure, use of mobile and internet, financial inclusion, ICT skills, possession of assets, etc. In addition, information related to drinking water, sanitation, energy use, birth registration, access to transport facilities, etc., was also collected. The survey collected both household and person-level information.

In CAMS, an attempt was made to collect person-level information on the formal education of erstwhile household members aged 18 years or above who are currently studying outside India. However, the survey could not capture a sufficient number of households where at least one member aged 18 years or above is currently studying outside India. The Working Group deliberated on this issue and observed that the total number of samples is insufficient to generate a reliable estimate. Working Group recommends that table based on this dataset is not required to be included in the report. Since the above-mentioned dataset is not usable for any policy purposes, the Working Group further recommends that unit-level data collected to generate the indicator may not be disseminated to avoid possible ambiguity in interpreting the results.

### 1.1 Survey coverage

The survey covered the whole of the Indian Union except some villages in the Andaman and Nicobar Islands, which were difficult to access. At the all-India level, the total number of first-stage units (FSUs) surveyed for the central sample was 15,298 (8,758 in rural areas and 6,540 in urban areas), the total number of households surveyed was 3,02,086 (1,73,096 in rural areas and 1,28,990 in urban areas). Further, 12,99,988 persons (7,85,246 in rural areas and 5,14,742 in urban areas) were enumerated at the all-India level.

### 1.2 The schedule

The data was collected through the schedule CAMS 2022-23. The Field Operations Division (FOD) of the NSSO conducted the fieldwork for the central sample. The Enterprise Survey Division (EnSD) [erstwhile Data Processing Division (DPD)] processed the data and generated tables based on which this report is prepared.

### **1.3 Survey methodology**

A stratified multi-stage design was adopted for CAMS 2022-23. The first stage units (FSU) were villages/ sub-units (SUs) in the rural sector and UFS blocks/SUs in the urban sector. The ultimate stage units (USU) were households in both rural and urban sectors.

To effectively capture information on out-of-pocket medical expenditures, all the households of selected FSUs were classified into two groups based on whether any household member was hospitalized during the last 365 days or not. A total of 20 households were randomly selected following Simple Random Sampling Without Replacement (SRSWOR) from each FSU, for detailed canvassing. Out of the selected 20 households, 5 households belong to the category where hospitalization case(s) were observed, and 15 households were selected from the remaining households.

### **1.4 State/ UT level estimates**

The report gives estimates of important indicators based on the central sample data, both at the national level and the State/UT level. The State/ UT-level detailed tables are given in Appendix A along with the Relative Standard Error (RSE) of some estimates. It is to be noted that due to the rounding-off effect, some of the row/ column totals may not add up exactly. Appendix B outlines some key concepts and definitions used in the survey. The details of the survey methodology and estimation procedure are given in Appendix C. Further, Appendix D gives a *facsimile* of schedule CAMS 2022-23. The key results of the survey at the all-India level are presented in the next section.

**2.1****Persons able to read and write short simple statements in their everyday life with understanding**

Statement 1 gives the percentage of persons able to read and write short simple statements in their everyday life with understanding as on date of survey, for different age groups at the all-India level. Information on the ability was obtained based on the informant's reporting, and no test was conducted to verify the same. Figure 1.1 presents sector-wise estimates, while Figures 1.2 and 1.3 provide gender-sector-wise estimates of the percentage of persons having this ability at all-India level. The corresponding State/UT level results are given at Table 1 in Appendix A.

**Statement 1: Percentage of persons able to read and write short simple statements in their everyday life with understanding**

all-India			
Age group (years)	Male	Female	Person
15 – 24	97.9	96.0	97.0
15 – 29	97.5	94.6	96.1
15 years and above	88.3	74.8	81.6

**Fig. 1.1: Percentage of persons able to read and write short simple statements in their everyday life with understanding**

**Fig. 1.2: Percentage of persons able to read and write short simple statements in their everyday life with understanding in rural areas**

**Fig. 1.3: Percentage of persons able to read and write short simple statements in their everyday life with understanding in urban areas**

**2.2**

**Persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations**

Statement 2 gives the percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations as on date of survey, for different age groups at the all-India level. Information on the ability was obtained based on the informant's reporting, and no test was conducted to verify the same. Figure 2.1 presents sector-wise estimates, while Figures 2.2 and 2.3 provide gender-sector-wise estimates of the percentage of persons having this ability at all-India level. The corresponding State/UT level results are given at Table 2 in Appendix A.

**Statement 2: Percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations**

all-India			
Age group (years)	Male	Female	Person
15 – 24	97.8	95.9	96.9
15 – 29	97.4	94.4	95.9
15 years and above	87.9	74.2	81.2

**Fig. 2.1: Percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations**

**Fig. 2.2: Percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations in rural areas**

**Fig. 2.3: Percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations in urban areas**

**2.3****Mean years of schooling in formal education**

In this survey, information was collected from each of the sampled persons, who were either ‘currently enrolled’ or ‘ever enrolled but currently not enrolled’ in formal education, on each course s/he attended/ attending, along with the corresponding number of years (excluding repeated years) completed/ attended. The detailed educational profiles of each individual in the sample were collected to accurately determine the total number of years spent in formal education. This information may not be used to derive class or course-wise enrollment figures in formal education. The mean years of schooling (MYS) is calculated as the weighted average of the number of years spent in formal education (excluding repeated years) for all persons for any age group like ‘15 years and above’. The calculation includes all courses and educational levels, including pre-primary education, regardless of whether they were completed or not. For instance, if a course has a duration of 3 years and a person attended 2 years only, then while calculating MYS, 2 years was considered. However, repeated years have not been considered in the calculation of MYS. Further, for person who were reported as ‘never enrolled’ in formal education, ‘0’ year is considered while calculating MYS.

Figures 3.1 and 3.2 present the mean years of schooling in formal education of persons of age ‘15 years and above’ and ‘25 years and above’ at the all-India level. The corresponding State/UT level results are given at Table 3 in Appendix A.

**Fig. 3.1: Mean years of schooling in formal education for the age group '15 years and above'**

**Fig. 3.2: Mean years of schooling in formal education for the age group '25 years and above'**

**2.4**

**Persons of age 6 to 10 years currently enrolled in primary education (Class I to Class V)**

Figure 4.1 gives the percentage distribution of persons aged ‘6-10 years’ who are currently enrolled in primary education (Class I to Class V) at the time of survey, for different genders at the all-India level. The corresponding State/UT level results are given at Table 4 in Appendix A.

**Fig. 4.1: Percentage of persons of age 6 to 10 years who reported as currently enrolled in primary education (Class I to Class V) at the time of survey**

Figure 4.2 gives the percentage distribution of persons aged ‘6-10 years’ who are currently enrolled in primary education (Class I to Class V) by type of school, for different sectors at the all-India level, at the time of the survey. The type category ‘Others’, in Fig 4.2 below, also includes ‘unrecognized’ schools and schools whose affiliation status is ‘not known’ to the respondents. The corresponding State/UT level results are given at Table 4 in Appendix A.

**Fig. 4.2: Percentage distribution of persons aged ‘6-10 years’ who are currently enrolled in primary education (Class I to Class V) by type of school at the time of survey**

## 2.5 Persons with some secondary education

Figure 5.1 shows the percentage of persons (age  $\geq 25$  years) with some secondary education. Here, if a person passed Class X or achieved a higher educational qualification, then that person was considered as a person ‘with some secondary education’. Figure 5.2 provides gender-sector-wise estimates of persons with some secondary education in the same age group. The corresponding State/UT level results are given at Table 5 in Appendix A.

**Fig. 5.1: Percentage of persons (age  $\geq 25$  years) with some secondary education**

**Fig. 5.2: Gender-sector-wise percentage of persons (age  $\geq 25$  years) with some secondary education**

**2.6**

**Persons of age 6 to 18 years who never enrolled in formal education by major reasons**

Figure 6.1 gives the percentage distribution of persons of age ‘6-18 years’ who were never enrolled in formal education, for different genders and sectors at the all-India level. The corresponding State/UT level results are given at Table 6 in Appendix A.

**Fig. 6.1: Percentage of persons of age 6 to 18 years who never enrolled in formal education**

Figure 6.2 gives the percentage distribution of persons of age ‘6-18 years’ who were never enrolled in formal education by major reasons, for different sectors at the all-India level. Among the reasons, ‘other reasons’ include reasons like ‘helping with domestic work’, ‘taking care of siblings’, ‘school far off’. It also includes those reasons that were not exactly classified by the enumerators using the code structure of the schedule. The corresponding State/UT level results are given at Table 6 in Appendix A.

**Figure 6.2: Persons of age 6 to 18 years who never enrolled in formal education by major reasons**

**2.7****Persons graduated in science and technology among all graduates**

Statement 3 gives the percentage of persons who graduated in Science and Technology among all graduates, for different age groups at the all-India level. Figure 7.1 presents sector-wise estimates, while Figures 7.2 and 7.3 provide gender-sector-wise estimates of the percentage of persons who graduated in Science and Technology among all graduates. The corresponding State/UT level results are given at Table 7 in Appendix A.

**Statement 3: Percentage of persons who graduated in Science and Technology among all graduates**

Age group (years)	all-India		
	Male	Female	Person
21 – 35	42.0	32.5	37.8
21 – 59	38.2	29.6	34.6
21 years and above	37.3	29.1	33.9

**Fig. 7.1 Percentage of persons who graduated in Science and Technology among all graduates**

**Fig. 7.2: Percentage of persons who graduated in Science and Technology among all graduates in rural areas**

**Fig. 7.3: Percentage of persons who graduated in Science and Technology among all graduates in urban areas**

**2.8**

**Youth in formal and non-formal education and training in the previous 12 months**

Figures 8.1 and 8.2 give the percentage of persons in formal and non-formal education and training during the last 12 months from the date of survey, for the age groups 15-24 years and 15-29 years across genders at the all-India level. The corresponding State/UT level results are given at Table 8 in Appendix A.

**Fig. 8.1: Percentage of youth in formal and non-formal education and training in the previous 12 months in the age group 15-24 years**

**Fig. 8.2: Percentage of youth in formal and non-formal education and training in the previous 12 months in the age group 15-29 years**

**2.9****Youth not in education, employment, or training**

In this survey, information was collected on the current status of enrolment, and training (formal as well as informal). Information on work/activity status for each of the persons in the age group 15 years and above during the last 7 days preceding the date of the survey was also ascertained. Figure 9.1 presents the percentage of youth reported to be not in education, employment, or training, as on date of survey, for different age groups and genders at the all-India level. The corresponding State/UT level results are given at Table 9 in Appendix A.

**Fig. 9.1: Percentage of youth reported to be not in education, employment, or training, as on date of survey, for the age group 15-24 years and 15-29 years**

**3.1****Expenditure (in Rs) on hospitalization (including institutional delivery) during last 365 days and non-hospitalization in a 30-day period**

Figures 10.1 and 10.2 present the average medical expenditure per household and per person on hospitalized treatment during last 365 days and average medical expenditure per household and per person on non-hospitalized treatment during last 30 days separately for rural and urban India. The corresponding State/UT level table is given at Table 10 in Appendix A.

**Fig. 10.1: Average medical expenditure (Rs.) per household and per person on hospitalized treatment (including institutional delivery) during last 365 days**

**Fig. 10.2: Average medical expenditure (Rs.) per household and per person on non-hospitalised treatment during last 30 days**

**3.2****Out-of-pocket medical expenditure (OOPME) on hospitalization and non-hospitalization**

Figures 11.1 and 11.2 present the average out of pocket medical expenditure per household and per person on hospitalized treatment during last 365 days and non-hospitalized treatment during last 30 days separately for rural and urban India. The corresponding State/UT level table is given at Table 11 in Appendix A.

**Fig. 11.1: Average out-of-pocket medical expenditure (OOPME) (Rs.) on hospitalisation during last 365 days**

**Fig. 11.2: Average out-of-pocket medical expenditure (OOPME) (Rs.) on non-hospitalised treatment during last 30 days**

**4.1****Accounts at bank/other financial institution/mobile money service provider**

Figure 12.1 gives the percentage of persons (*18 years and above*) who had an account individually or jointly in any bank/other financial institution or with mobile money service provider as on date of survey for each of the gender at all-India level. The corresponding State/UT results are given at Table 12 in Appendix A.

**Fig. 12.1: Percentage of persons (age  $\geq 18$  years) who have an account individually or jointly in any bank/ other financial institution/mobile money service provider**

**4.2****Number of borrowers per 1,00,000 persons**

In this survey, a person is considered to be indebted if s/he has taken a cash loan of Rs 500/- or above and that loan remained outstanding as on the date of survey. Figure 13.1 gives the number of borrowers per 1,00,000 persons (*18 years and above*) who were indebted to any institutional/ non-institutional agency as on date of survey for each gender at all-India level. The corresponding State/UT level results are given at Table 13 in Appendix A.

**Fig. 13.1 Number of borrowers (age  $\geq 18$  years) per 1,00,000 persons**

**5.1****Persons able to use mobile (including smartphone)**

Statement 4 gives the percentage of persons able to use mobile (including smartphone), as on date of survey, for different age groups and genders at the all-India level. Figure 14.1 presents sector-wise estimates, while Figures 14.2 and 14.3 provide gender-sector-wise estimates of the percentage of persons able to use mobile at all-India level. The corresponding State/UT level results are given at Table 14 in Appendix A.

**Statement 4: Percentage of persons able to use mobile (including smartphone) as on date of survey**

Age group (years)	all-India		
	Male	Female	Person
15 – 24	97.4	94.6	96.1
15 – 29	97.9	94.8	96.4
15 years and above	92.2	80.6	86.5

### 5.3

### Persons able to use internet

Statement 6 gives the percentage of persons able to use internet, as on date of survey, for different age groups and genders at the all-India level. Figure 16.1 presents sector-wise estimates, while Figures 16.2 and 16.3 provide gender-sector-wise estimates of the percentage of persons able to use internet at all-India level. The corresponding State/UT level results are given at Table 16 in Appendix A.

Statement 6: Percentage of persons able to use internet as on date of survey all-India			
Age group (years)	Male	Female	Person
15 – 24	89.1	80.0	84.8
15 – 29	89.2	78.8	84.2
15 years and above	67.6	51.8	59.8

**Fig. 16.1: Percentage of persons able to use internet as on date of survey**

**Fig. 16.2: Percentage of persons able to use internet as on date of survey in rural areas**

**Fig. 16.3: Percentage of persons able to use internet as on date of survey in urban areas**

**5.4****Use of Internet during the last 3 months preceding the date of survey**

Statement 7 gives the percentage of persons who used internet during last 3 months preceding the date of survey for different age groups and genders at the all-India level. Figure 17.1 presents sector-wise estimates, while Figures 17.2 and 17.3 provide gender-sector-wise estimates of the percentage of persons used internet during last 3 months at all-India level. The corresponding State/UT level results are given at Table 17 in Appendix A.

**Statement 7: Percentage of persons who used internet during last 3 months preceding the date of survey**

Age group (years)	all-India		
	Male	Female	Person
15 – 24	87.9	78.3	83.3
15 – 29	88.1	77.1	82.8
15 years and above	65.5	49.3	57.5

**Fig. 17.1: Percentage of persons who used internet during last three months preceding the date of survey**

**Fig. 17.2: Percentage of persons who used internet during last three months preceding the date of survey in rural areas**

**Fig. 17.3: Percentage of persons who used internet during last three months preceding the date of survey in urban areas**

**5.5**

**Population covered by 4G or above mobile technology**

Information on mobile technology mainly used was collected from each of the sample persons enumerated. If within an FSU, a person reported use of 4G or above mobile technology, the entire population of that FSU has been considered to be covered by 4G or above mobile technology. Figure 16.1 gives the percentage of persons covered by 4G or above mobile technology, at the all-India level. The corresponding State/UT level results are given at Table 18 in Appendix A.

**Fig. 16.1: Percentage of population covered by 4G or above mobile technology**

## 6.1 Persons sent messages with attached files

Statement 7 shows the percentages of persons who reported executing the skill of ‘sent messages (e.g., e-mail, messaging service, SMS) with attached files (e.g., documents, pictures, video)’, using mobile or computer-like devices, during the last three months preceding the date of survey at the all-India level for different age groups. Figure 17.1 presents sector-wise estimates, while Figures 17.2 and 17.3 provide gender-sector-wise estimates of the indicator. The corresponding State/UT level results are given at Table 19 in Appendix A.

**Statement 7: Percentage of persons reported execution of skill of ‘sending messages (e.g., e-mail, messaging service, SMS) with attached files (e.g., documents, pictures, and video)’**

all-India			
Age group (years)	Male	Female	Person
15 – 24	83.6	72.7	78.4
15 – 29	83.8	71.1	77.7
15 years and above	61.0	43.8	52.5

**Fig. 17.1: Percentage of persons reported execution of skill of ‘sending messages (e.g., e-mail, messaging service, SMS) with attached files (e.g., documents, pictures, and video)’**

**Fig. 17.2: Percentage of persons reported execution of skill of sending messages in rural areas**

**Fig. 17.3: Percentage of persons reported execution of skill of sending messages in urban areas**

## 6.2 Persons used copy and paste tools

Statement 8 shows the percentages of persons who reported executing the skill of ‘copy and paste tools to duplicate or move data, information, documents, etc.’, using mobile or computer-like devices, during the last three months preceding the date of survey at the all-India level for different age groups. Figure 18.1 presents sector-wise estimates, while Figures 18.2 and 18.3 provide gender-sector-wise estimates of the indicator. The corresponding State/UT level results are given at Table 20 in Appendix A.

**Statement 8: Percentage of persons reported execution of skill of ‘copy and paste tools to duplicate or move data, information, documents, etc.’**  
all-India

Age group (years)	Male	Female	Person
15 – 24	76.9	64.9	71.2
15 – 29	76.8	63.0	70.2
15 years and above	54.2	37.6	46.1

**Fig. 18.1: Percentage of persons reported execution of skill of ‘copy and paste tools to duplicate or move data, information, documents, etc.’**

**Fig. 18.2: Percentage of persons reported execution of skill of copy and paste tools in rural areas**

**Fig. 18.3: Percentage of persons reported execution of skill of sending messages in urban areas**

### 6.3.1 Persons able to search internet for information

Figures 19.1.1, 19.1.2 and 19.1.3 present gender and sector-wise estimates of the percentage of persons who can search internet for information, for different age groups. The corresponding State/UT level results are given at Table 21 in Appendix A.

**Fig. 19.1.1: Percentage of persons who can search internet for information in the age group 15-24 years**

**Fig. 19.1.2: Percentage of persons who can search internet for information in the age group 15-29 years**

**Fig. 19.1.3: Percentage of persons who can search internet for information in the age group 15 years and above**

### 6.3.2 Persons able to send or receive emails

Figures 19.2.1, 19.2.2 and 19.2.3 present gender and sector-wise estimates of the percentage of persons who can send or receive emails, for different age groups. The corresponding State/UT level results are given at Table 21 in Appendix A.

**Fig 19.2.1: Percentage of persons who can send or receive emails in the age group 15-24 years**

**Fig 19.2.2: Percentage of persons who can send or receive emails in the age group 15-29 years**

**Fig 19.2.3: Percentage of persons who can send or receive emails in the age group 15 years and above**

### 6.3.3 Persons able to perform online banking transactions

Figures 19.3.1, 19.3.2 and 19.3.3 present gender and sector-wise estimates of the percentage of persons who can perform online banking transactions, for different age groups. The corresponding State/UT level results are given at Table 21 in Appendix A.

**Fig 19.3.1: Percentage of persons who can perform online banking transactions in the age group 15-24 years**

**Fig 19.3.2: Percentage of persons who can perform online banking transactions in the age group 15-29 years**

**Fig 19.3.3: Percentage of persons who can perform online banking transactions in the age group 15 years and above**

**6.3.4**

**Persons able to search internet for information and able to send or receive emails and able to perform online banking transaction**

Figures 19.4.1, 19.4.2 and 19.4.3 present gender and sector-wise estimates of the percentage of persons who can search internet for information and who can send or receive emails and who can perform online banking transactions simultaneously, for different age groups. The corresponding State/UT level results are given at Table 21 in Appendix A.

**Fig. 19.4.1: Percentage of persons who can search internet for information and who can send or receive emails and who can perform online banking transactions simultaneously in the age group 15-24 years**

**Fig. 19.4.2: Percentage of persons who can search internet for information and who can send or receive emails and who can perform online banking transactions simultaneously in the age group 15-29 years**

**Fig. 19.4.3: Percentage of persons who can search internet for information and who can send or receive emails and who can perform online banking transactions simultaneously in the age group 15 years and above**

**7.1****Assets possessed by household**

Figures 20.1 and 20.2 show the percentage of households possessing (for household use purposes) different assets and amenities, at all-India level. The corresponding State/UT level results are given at Table 22 in Appendix A.

**Fig. 20.1: Percentage of households possessing telephone/ mobile phone\***

\*: telephone includes landline and mobile phone includes smartphone

**Fig. 20.2: Percentage of households possessing computer<sup>#</sup>**

#: includes desktop PC, laptop etc.

## **7.2**

### **Access to transport facilities**

Figures 21.1 and 21.2 present the percentage of the urban population having convenient access to low-capacity public transport (*bus, car, taxi, auto etc.*) within 500 meters and percentage of the urban population having convenient access to high-capacity public transport (*train, metro, ferry etc.*) within 1 km from place of living, at all-India level. The corresponding State/UT level tables are given at Table 23 in Appendix A.

**Fig. 21.1: Percentage of the urban population having convenient access to low-capacity public transport (*bus, car, taxi, auto etc.*) within 500 meters from place of living**

**Fig. 21.2: Percentage of the urban population having convenient access to high-capacity public transport (*train, metro, ferry etc.*) within 1 km from place of living**

**7.3**

**Availability of all-weather road within 2 km**

Figure 22.1 gives the percentage of persons with all-weather roads within a distance of 2 km from the place of living of the household in rural areas, at all-India level. The corresponding State/UT level tables are given at Table 23 in Appendix A.

**Fig. 22.1: Percentage of the rural population with all-weather roads within in a distance of 2 km from the place of living**

## **7.4**

### **Registration of births/receipt of birth certificates**

In this survey, information was collected on whether children under the age of 5 years had ever received birth certificates. Additionally, for those children under the age of 5 years who had not received birth certificates or whose birth certificate status was unknown to the respondents, information was collected on whether they were registered with civil authorities (like municipality, panchayat, Government health institution or other local authority appointed by the State Government for registration of birth and issue of birth certificate) for birth certificates. It is to be noted that for collecting this information, only the response of the informant was considered. No checking on the part of the data collector was carried out on whether the affirmative households possessed the certificate or not.

Figure 23.1 gives the percentage of persons of age less than 5 years who have registered with civil authority for the birth certificate ever (including those who received birth certificates) for each of the genders at the all-India level. The corresponding State/UT level results are given at Table 24 in Appendix A.

**Fig. 23.1: Percentage of persons of age less than 5 years, who have registered with civil authority for birth certificate ever**

**7.5****Use of clean fuel as the primary source of energy for cooking**

In this survey, *primary source of energy for cooking* was defined as the source of energy which the household used majority of the time for cooking. A household is categorised as using clean fuel for cooking, if the household reported the use of any one of the primary sources, viz. (i) LPG/ other natural gas, (ii) gobar gas/ other biogas, (iii) electricity (incl. generated by solar /wind power generators), (iv) solar cooker for cooking.

Figure 24.1 gives the percentage of households using clean fuel for cooking (among households reported having cooking arrangements) at the all-India level. The corresponding State/UT level results are given at Table 25 in Appendix A.

**Fig. 24.1: Percentage of households using clean fuel for cooking  
(among households reported having cooking arrangements)**

## **7.6**

### **Improved principal source of drinking water**

In this survey, the *principal source of drinking water* of a household meant the source of water from which the household obtained most of its drinking water during the last 365 days. The information on the principal source of drinking water of the household was collected using seventeen categories viz. (i) bottled water, (ii) piped water into dwelling, (iii) piped water to yard/plot, (iv) piped water from neighbour, (v) public tap/standpipe, (vi) tube well, (vii) hand pump, (viii) protected well, (ix) unprotected well, (x) public tanker truck, (xi) private tanker truck, (xii) protected spring, (xiii) unprotected spring, (xiv) rainwater collection, (xv) tank/pond, (xvi) other surface water (river, dam, stream, canal, lake, etc.) and (xvii) others (cart with small tank or drum, etc.). Out of these seventeen categories of principal sources of drinking water, the sources viz. (i) bottled water, (ii) piped water into dwelling, (iii) piped water to yard/plot, (iv) piped water from neighbour, (v) public tap/standpipe, (vi) tube well, (vii) hand pump, (viii) protected well, (ix) public tanker truck, (x) private tanker truck, (xi) protected spring and (xii) rainwater collection are considered as *improved sources of drinking water*.

Figure 25.1 gives the percentage of households having access to improved principal sources of drinking water at the all-India level. The corresponding State/UT table is given at Table 26 in Appendix A.

**Fig. 25.1: Percentage of households having access to improved principal source of drinking water**

**7.7****Access to improved latrine**

In this survey, a household was considered to have access to a latrine if the majority of household members had the facility of using the latrine, irrespective of whether it was used by them or not. The information on type latrine was collected on: (i) Flush/pour-flush to piped sewer system, (ii) Flush/pour-flush to septic tank, (iii) Flush/pour-flush to twin leach pits/single pit, (iv) Flush/pour-flush to elsewhere (open drain, open pit, open field, etc), (v) Ventilated improved pit latrine, (vi) Pit latrine with slab, (vii) Pit latrine without slab/open pit, (viii) Composting latrine and (ix) Others. Out of these different types of latrines, the types viz. (i) Flush/pour-flush to piped sewer system, (ii) Flush/pour-flush to septic tank, (iii) Flush/pour-flush to twin leach pits/single pit, (iv) Ventilated improved pit latrine, (v) Pit latrine with slab and (vi) Composting latrine are considered as *improved latrine*.

Figure 26.1 gives the percentage of households with access to improved latrine (among households reported having access to latrine) at the all-India level. The corresponding State/UT table is given at Table 26 in Appendix A.

**Fig. 26.1: Percentage of households having access to improved latrine  
(among households with access to latrine)**

In this survey, information on variables like education, health, assets, transport facilities, etc. were collected from the randomly selected households. The information on expenditure incurred by households on hospitalization and non-hospitalization was collected with reference periods of last 365 days and last 30 days respectively. Although, a general-purpose sampling design can effectively capture information on assets, transport facilities, but the same may not be equally efficient for collecting information on health and education. To ensure that the expenditures related to hospitalization were captured properly, the survey design used stratification to capture a sufficient number of households with hospitalization expenses over the last 365 days preceding the date of survey. Since, there is a constraint in adopting multiple stratification criteria for a single schedule, no stratification based on other criteria like education has been adopted. Despite this, the Relative Standard Error (RSE) for indicators related to education etc. mostly remains within acceptable limits. The interpretation of survey results should be performed considering the RSE associated with the estimates. When analysing and interpreting the data, it is important to consider the limited sample size of specific indicators, and/ or domains like small states or union territories. It is also to be noted that the survey-based estimated totals are used to compute rates and ratios only. It is not prudent to use survey-based estimated totals to interpret any results.

Further, the objective of the health module of CAMS was to compile information on ‘Average out-of-pocket expenditure’ for hospitalized and non-hospitalized treatment by households. To arrive at the total expenditure incurred by the household on account of health, the survey has collected expenditure at disaggregated levels by various components of expenditure such as (i) package component and (ii) non-package component (doctor’s fee, medicine, diagnostic test, bed charges, other medical expenses, transport expenses). Quite often, it was found that households had difficulties in reporting break-ups of the total expenditure incurred. In many such cases, the total expenditure incurred for availing hospitalized treatment had been reported against package components, although there is a possibility that some of these might not have been availed as a package. Thus, some proportion of the package component might include expenditure for treatment taken under the non-package component. It may also be noted that the information was recorded as reported by the household and had not been verified/cross-checked with any records or documents. In view of the above, users of the unit-level data are advised not to make use of the component-wise expenditure for the estimation of any indicators, as such an exercise may lead to misleading and inappropriate conclusions.

### **Concepts and Definitions**

## **Concepts and Definitions**

1 Concepts and definitions of some important terms used in this report are described below:

1.1 Coverage of enrolment in education: Enrolment covered education acquired through formal pre-school, school, college, university, institutions, ITIs, vocational/ technical training institutes, special schools for children with special needs, etc. Formal education covered general, technical, professional, and vocational courses offered by schools, colleges, universities, open schools, open and distance education universities, CA/ CFA/ ICWA/ CS, or similar professional bodies or other institutions. Enrolment also covered enrolment in kindergarten (upper and lower), nursery, pre-primary school, Early Childhood Care and Education (ECCE) of Aanganwadi etc.

However, enrolment did not cover the following:

- i. Education acquired through play schools or any Government run literacy programmes e.g., Non-Formal Education Centres/Total Literacy Campaign/Adult Education Centres and similar programmes run by NGOs,
- ii. Gaining knowledge from master craftsmen, motor repair shops, parents/ relatives who work in agriculture, tailoring, pottery, cobbling, carpenter, etc; work-based training given at offices.

1.2 The ability to read and write short simple statements in everyday life with understanding for a particular age group is estimated by considering the following two cases. Case I: For persons who have never been enrolled in formal education, questions were administered to determine if they have the ability to read and write short, simple statements with understanding.

Case II: For persons who are either currently enrolled or have ever been enrolled in formal education, they were categorized as having the ability to read and write short, simple statements with understanding if they have at least attended and completed pre-primary or Class I level of education.

It is to be noted that no test of the ability was performed.

## **Appendix B: Concepts and Definitions**

1.2.1 Simple arithmetic calculations involve the ability to perform basic mathematical operations such as addition, subtraction, multiplication, and division, which individuals typically use in their day-to-day lives. However, no specific test was conducted to assess an individual's ability to perform these simple arithmetic calculations.

1.3 While canvassing the CAMS 2022-23 schedule, each of the members (of age 3 years and above) of the sampled household was enquired about details of courses currently enrolled and/or ever enrolled in formal education starting from pre-primary level of education and the number of years attended/completed in each such course(s) excluding repeated years, as on the date of survey were also recorded.

1.3.1 Mean Years of Schooling of the persons of a particular age group (say, 15 years or above / 25 years or above) indicates the weighted average number of completed years in formal education of a country's population of that age group, excluding years spent repeating individual grades. Mean Years of Schooling (MYS) for each gender, sector, and age group is calculated using the following formulae:

$$\text{MYS} = \frac{\sum_{j=1}^m \sum_{i=1}^{n_j} y_{ij} \times w_j \times I_i(.)}{\sum_{j=1}^m \sum_{i=1}^{n_j} w_j \times I_i(.)}$$

where,

$y_{ij}$  = number of years (excluding repeated years) spent in formal education by the  $i^{th}$  individual in the  $j^{th}$  household

$w_j$  = design-based weight (multiplier) of the  $j^{th}$  household

$I_i(.)$  = Indicator variable that takes value 1 if the age of the  $i^{th}$  individual is greater than or equal to  $T$ , and 0 otherwise.

$m$  = total number of sampled households

$n_j$  = number of individuals in the  $j^{th}$  household

$T$  = threshold age for the age group under consideration

1.3.2 Suppose a person is currently in the third year of a college graduation course. Prior to that, he attended 2 years of pre-primary education and 12 years of schooling. Therefore, the total number of years considered for calculating the Mean Years of Schooling (MYS) is  $(2 + 12 + 2)$  years, i.e. 16 years.

1.4 Graduate in Science and Technology: A person has been considered as graduated in science and technology if s/he has completed graduate (degree/diploma) level courses or

undergoing post-graduate degree/diploma or doctorate/post-doctorate degree in at least one of the disciplines like Agriculture and Fisheries, Engineering and Technology, IT and Computer Science, Medical science (including Nursing), Management, Science, Veterinary and Animal Sciences.

1.5 Hospitalisation: Hospitalization meant admission as in-patient – for treatment of ailment or injury, or childbirth – to any medical institution. Further, childbirths sometimes take place in Health Sub-Centres; such cases of delivery were also considered as hospitalization. Surgeries undergone in temporary camps set up for treatment of aliments, such as eye camps, were treated as cases of hospitalization.

1.6 Medical expenditure: This included bed charges, doctor's/surgeon's fees, the total amount paid for medicines, diagnostic tests, attendant charges, physiotherapy, personal medical appliances, blood, oxygen, etc. during the stay at the hospital (within the reference period) – whether made available by the hospital or procured from outside. Expenses on transportation of the patient to or from the hospital were excluded.

1.7 Out-of-pocket medical expenditure: In cases of both hospitalised and non-hospitalised treatment, some amount of medical expenditure may be reimbursed by employers or insurance companies (public or private), or other agencies. In this survey, expenditures were recorded when borne initially by the patient's household, whether or not reimbursed later. The amount reimbursed later was also separately recorded. Out-of-pocket medical expenditure is the total medical expenditure initially borne by the households less reimbursement received later on account of hospitalized/non-hospitalized treatment.

1.8 Bank: In this survey, the bank referred to commercial banks including foreign commercial banks operating in India, nationalized banks, regional rural banks, cooperative societies, district or central cooperative banks or other types of cooperative societies.

1.9 Other financial institutions: Other financial institutions included credit unions, microfinance institutions, cooperatives, or post offices (if applicable), or having a debit card in own name. Account at a financial institution may have been used for receiving wages, government transfers, and payments for agricultural products and for paying utility bills or school fees in the past 12 months from the date of survey.

## ***Appendix B: Concepts and Definitions***

1.10 Mobile-money-service provider: It generally refers to payment services operated under financial regulations and performed from or via mobile device. Instead of paying with cash, cheque or credit card, a consumer can use a mobile to pay for a wide range of services.

1.11 In this survey, information on the execution of some ICT skills (like send messages with attached files, use copy and paste tools to duplicate or move information, documents etc.) was collected from sample persons of age 15 years and above with the reference period of last three months preceding the date of survey. Further, the information on the ability to perform certain skills (like searching of internet for information, sending or receiving emails, performing online banking transactions) was collected for sample persons. It is to be noted that information on the execution/ability to perform the skills was collected based on the reporting of the informant only. While collecting this information, no tests of the skills of the informants were performed.

## *Appendix C*

### **Survey Design and Estimation Procedure**

## Survey Design and Estimation Procedure

### 1.0 Introduction

The National Sample Survey (NSS) undertook Comprehensive Annual Modular Survey (CAMS) as a part of its 79<sup>th</sup> round during the period July, 2022 to June, 2023.

**1.1 Geographical coverage:** The survey covered the whole of the Indian Union except for some villages in the Andaman and Nicobar Islands which were difficult to access.

**1.2 Sub-rounds:** The survey period of the round was divided into four sub-rounds of three months duration each as follows:

sub-round 1	July - September 2022
sub-round 2	October - December 2022
sub-round 3	January - March 2023
sub-round 4	April - June 2023

In each of these sub-rounds equal number of sample First Stage Units (FSUs) (villages/urban blocks) was allotted for survey to ensure uniform spread of sample FSUs over the entire survey period. An attempt was also made to survey each of the FSUs during the sub-round to which it was allotted. Because of the arduous field conditions, this restriction was not strictly enforced in Andaman and Nicobar Islands, Lakshadweep, Leh and Kargil districts of Ladakh and rural areas of Arunachal Pradesh and Nagaland.

**1.3 Schedules of enquiry:** The following Schedules of enquiry were canvassed for the survey on CAMS:

Schedule OOCM	List of Households
Schedule CAMS 2022-23	Comprehensive Annual Modular Survey

**1.4 Participation of States:** All the States and Union Territories except Andaman & Nicobar Islands, Daman & Diu and Dadra & Nagar Haveli participated in the 79<sup>th</sup> round survey of NSS. The following was the matching pattern of samples for the participating States/UTs in this round:

State/UT	Extent of matching of samples
Nagaland (U)	Triple
Manipur, Telangana	Double
Maharashtra (U)	one and half
Remaining States/ UTs	Equal

## **Appendix C: Survey Design and Estimation Procedure**

### **2.0 Sample Design, Sampling Frame, Stratification Criteria**

#### **2.1.1 Formation of sub-units (SUs):**

**2.1.1.1 Rural areas:** The projected population of a rural village with Census 2011 population 1000 or more was determined first by applying suitable growth rates to the Census 2011 population. Thereafter, it was notionally divided into a number of sub-units (SU) of more or less equal population. The number of SUs to be formed in a village was determined apriori. The following criteria were adopted for deciding the number of SUs to be formed:

projected population of the village (1)	no. of SUs to be formed (2)
less than 1200	1
1200 to 2399	2
2400 to 3599	3
3600 to 4799	4
4800 to 5999	5
.....and so on	....

#### **2.1.1.2 Special case:**

For rural areas of (i) Himachal Pradesh, (ii) Sikkim, (iii) Andaman & Nicobar Islands, (iv) Uttarakhand (except the districts Dehradun, Nainital, Hardwar and Udham Singh Nagar), (v) Punch, Rajouri, Udhampur, Reasi, Doda, Kishtwar, Ramban of Jammu and Kashmir (vi) Leh and Kargil districts of Ladakh region and (vii) Idukki district of Kerala, numbers of SUs to be formed in a village were determined in such a way that each SU contains 600 or less projected population. Further, SUs were not formed in the villages in the above mentioned districts/States with population less than 500 as per Census 2011. In the remaining villages, the criteria for deciding the number of SUs were as below:

projected population of the village (1)	no. of SUs to be formed (2)
less than 600	1
600 to 1199	2
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
.....and so on	....

For rural parts of Kerala, similar procedure as mentioned in para 2.1.1.1 above was adopted with the modification that the SUs were formed within Panchayat Wards instead of villages.

**2.1.1.3 Urban areas:** SUs were formed in urban sector also. The procedure is similar to that adopted in rural areas except that SUs were formed on the basis of number of households in the UFS frame, as UFS frame does not have population. Each UFS block with number of households more than or equal to 250 was divided into a number of SUs. The following criteria

## ***Appendix C: Survey Design and Estimation Procedure***

were adopted for deciding the number of SUs to be formed in the UFS blocks of the frame and the number of SUs was decided before selection of the samples:

number of households of the UFS block (1)	no. of SUs to be formed (2)
less than 250	1
250 to 499	2
500 to 749	3
750 to 999	4
1000 to 1249	5
.....and so on	....

**2.1.2 Sample design:** A stratified multi-stage design was adopted for the 79<sup>th</sup> round survey. *The first stage units (FSU) were villages/UFS blocks/sub-units (SUs) as per the situation.* The ultimate stage units (USU) were households in both sectors.

### **2.1.3 Sampling Frame for First Stage Units (FSUs):**

**2.1.3.1** There was no SU formation in uninhabited villages and villages (Panchayat wards for Kerala) with population less than 1000 as per Census 2011 (less than 500 as per Census 2011 for the areas mentioned in para 2.1.1.2) and the entire village was considered as one FSU. All such villages (Panchayat wards for Kerala) were regarded as the First Stage Units (FSUs).

**2.1.3.2** In the remaining villages, notional sub-units (SUs) were formed using the procedure as described above in para 2.1.1. Such SUs were considered as the First Stage Units (FSUs).

**2.1.3.3** For the UFS blocks with less than 250 households, the entire UFS block was considered as one FSU. In the remaining UFS blocks, the SUs were considered as the First Stage Units (FSUs).

**2.1.3.4** The list of FSUs as described above constitutes the sampling frame for respective sectors, i.e., rural and urban areas.

### **2.3.4 Stratification of FSUs:**

#### **2.3.4.1 Rural areas:**

A Special Rural stratum, at all-India level for central sample, was formed comprising all the uninhabited villages as per Census 2011 belonging to all States/UTs.

For the remaining villages which are inhabited as per Census 2011, districts were the basic geographical unit for stratum formation. Within each district, two Stratum were formed:

- (a) The villages (i) within a distance of 5 km from the district headquarters or (ii) within a distance of 5 km from a city/town with more than 5 lakh population, form a stratum (stratum 1).
- (b) Rest of the villages constitute another stratum (stratum 2) of the particular district.

## **Appendix C: Survey Design and Estimation Procedure**

A special rural stratum was also formed for the State samples for those States/UTs that have at least 50 uninhabited villages as per Census 2011.

### **2.3.4.2 Urban Sector:**

Two or more strata were formed in urban areas of each district:

- (i) Each million-plus city as per Census 2011 constitutes a separate stratum and numbered as 01, 02, 03....,19.
- (ii) Rest of the urban areas of the district form another stratum and this was numbered as Stratum 20.

### **2.3.5 Sub-stratification of FSUs:**

**2.3.5.1 Rural sector:** Three groups of villages were formed within each stratum, except special rural stratum at all-India level as mentioned in para 2.1.1.2.

Group 1: all villages (Panchayat wards for Kerala) with Census 2011 population less than 250

Group 2: all villages (Panchayat wards for Kerala) with Census 2011 population more than or equal to 250 but less than 500

Group 3: remaining villages

The sample size for a rural stratum was allocated among 3 groups in proportion to population. Let  $r_1$ ,  $r_2$  and  $r_3$  be the allocations to Group 1, Group 2 and Group 3, respectively. The villages within each group were first arranged in ascending order of number of populations. For all the three groups within each stratum, ' $r_1/4 > 1$ ', ' $r_2/4 > 1$ ' and ' $r_3/4 > 1$ ', implying formation of 2 or more sub-strata in each group. Sub-strata were demarcated in Group 1, Group 2 and Group 3 respectively in such a way that each sub-stratum comprised a group of villages (all SUs of a village considered together) of the arranged frame and had more or less equal population.

If number of FSUs in a particular Group was very small, no sub-stratum was formed in that Group.

**2.3.5.2 Urban sector:** Let 'u' be the sample size allocated for an urban stratum. For all strata, if ' $u/4 > 1$ ', implying formation of 2 or more sub-strata, all the UFS blocks within the stratum were first arranged in ascending order of total number of households in the UFS blocks as per urban frame. Then sub-strata were demarcated in such a way that each sub-stratum comprised of a group of UFS blocks (all SUs of a block considered together) with more or less equal number of households. If number of blocks in a particular stratum was very small, no sub-stratum was formed in that stratum.

**2.3.6 Total sample size (FSUs):** 15416 FSUs were allotted at the all-India level for CAMS survey. State/UT-wise allocation of sample FSUs are given in Table 1. Further, as referred in para 2.3.4.1 the State/UT-wise allocation of central sample FSUs in special stratum is given in Table 2. Both Table 1 and Table 2 may be seen at the end of this chapter.

### **2.3.7 Selection of FSUs within a stratum/sub-stratum:**

2.3.7.1 From all the sub-strata in both rural and urban sectors within each stratum, the required number of FSUs was selected by Simple Random Sampling without Replacement (SRSWOR) scheme.

**2.3.8 Listing of households:** All the households of the sample FSU were included in the list of households. Temporarily locked households were also included after ascertaining the temporariness of the absence of the households through local enquiry.

**2.3.9 Formation of Sub-divisions in the selected SU:** It has been experienced in the previous NSS surveys that, there happen to be some extreme cases where the approximate ascertained present population/number of households in the selected SU was very high and listing becomes very difficult. To take care of such extreme situations, the SU was sub-divided into a number of smaller units (sub-divisions), each containing more or less equal population content, and one of them was randomly selected. Listing and selection of households were then carried out within the selected sub-division unit only. The procedure for formation of sub-divisions is the same as that for formation of SUs within villages/blocks.

The criteria for determining the number of sub-divisions ( $D_1$ ) to be formed in the selected rural/urban SUs are as follows:

Approx. population of the SU (1)	no. of Sub-divisions ( $D_1$ ) to (2)
less than 1500	1
1500 to 2399	2
2400 to 3599	3
3600 to 4799	4
4800 to 5999	5
.....and so on	....

### **2.3.10 Special case:**

2.3.10.1 For rural areas of (i) Himachal Pradesh, (ii) Sikkim, (iii) Andaman & Nicobar Islands, (iv) Uttarakhand (except four districts Dehradun, Nainital, Hardwar and Udhampur Singh Nagar), (v) Punch, Rajouri, Udhampur, Reasi, Doda, Kishtwar, Ramban of Jammu (vi) Leh and Kargil districts of Ladakh region and (vii) Idukki district of Kerala, the criterion for determining the number of sub-divisions ( $D_1$ ) to be formed in rural SUs is as follows:

Approx. population of the SU (1)	no. of Sub-divisions to be (2)
less than 750	1
750 to 1199	2
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
.....and so on	....

## **Appendix C: Survey Design and Estimation Procedure**

### **2.3.11 Formation of second stage strata (SSS) of households and allocation among SSS:**

2 SSS with the following criteria were formed.

- SSS1: households with at least one member (including deceased former member) hospitalized (including institutional childbirth) during last 365 days.
- SSS2: Consisting of the remaining households.

A total of 20 households from a selected FSU were surveyed. 5 households from SSS1 and 15 from SSS2 were chosen with simple random sampling without replacement (SRSWOR).

### **2.3.12 Selection of households:** The sample households from each SSS were selected by simple random sampling without replacement (SRSWOR).

## **3.0 Estimation Procedure**

### **3.1 Notations:**

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

i = subscript for i-th FSU [SU/ village /panchayat ward/ block]

j = subscript for j-th second stage stratum in an FSU

k = subscript for k-th sample household within an FSU

D<sub>1</sub> = total number of sub-divisions formed in the sample FSU. D<sub>1</sub>=1, if no sub-division is formed in the SU

N = total number of FSUs in any rural/urban sub-stratum

n = number of sample FSUs surveyed including ‘uninhabited’ and ‘zero cases’ but excluding casualty for a particular sub-stratum

H = total number of households listed in a second-stage stratum of an FSU

h = number of households surveyed in a second-stage stratum of an FSU

x, y = observed value of characteristics x, y under estimation

$\hat{X}$ ,  $\hat{Y}$  = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stijk}$  = observed value of the characteristic y for the k-th household of the j-th second stage stratum of the i-th FSU for the t-th sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

### **3.2 Formulae for Estimation of Aggregates for a stratum × sub-stratum:**

#### **3.2.1 Schedule 00CM (Rural/Urban):**

- (i) For estimating the number of households in a stratum × sub-stratum possessing a characteristic:

$$\hat{Y} = \frac{N}{n} \sum_{i=1}^n D_1 \times y_i$$

where  $y_i$  is the total number of households possessing the characteristic  $y$  in  $i$ -th FSU respectively.

#### **3.2.2 For $j$ -th second-stage stratum of a stratum × sub-stratum:**

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[ D_1 * \frac{H_{ij}}{h_{ij}} \sum_{k=1}^{h_{ij}} y_{ijk} \right]$$

Where  $n_j$  is the number of sample FSUs with non-void  $j$ -th second-stage stratum.

#### **3.2.3 Aggregate $\hat{Y}$ is obtained combining all the second-stage strata:**

$$\hat{Y} = \sum_j \hat{Y}_j$$

*Note:* for Schedule CAMS 2022-23,  $j = 1, 2$ .

### **3.3 Overall Estimate for Aggregates for a stratum:**

Overall estimate for a stratum ( $\hat{Y}_s$ ) will be obtained as

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

### **3.4 Overall Estimate of Aggregates at State/UT/all-India level:**

The overall estimate  $\hat{Y}$  at the State/ UT/ all-India level is obtained by summing the stratum estimates  $\hat{Y}_s$  over all strata belonging to the State/ UT/ all-India.

### **3.5 Estimates of Ratios:**

Let  $\hat{Y}$  and  $\hat{X}$  be the overall estimates of the aggregates  $Y$  and  $X$  for two characteristics  $y$  and  $x$  respectively at the State/ UT/ all-India level.

## Appendix C: Survey Design and Estimation Procedure

Then the combined ratio estimate ( $\hat{R}$ ) of the ratio ( $R = \frac{Y}{X}$ ) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}.$$

### 3.6 Estimation of Errors:

#### 3.6.1 Formula for estimated variance (for Rural/Urban):

3.6.1.1 Here FSU is selected by SRSWOR method and USU (households) also selected SRSWOR method. If  $i^{th}$  FSU has been selected then  $h_i$  unit is selected from this particular FSU  $\times$  SSS by SRSWOR method.

##### (a) Formula for aggregate $\hat{Y}$ (for Rural/Urban):

$$\hat{Y}_{ij} = H_{ij} \times \bar{y}_{ij} \times D_{1si} \text{ and } \bar{y}_{ij} = \frac{\sum_{k=1}^{h_{ij}} y_{ijk}}{h_{ij}}$$

$$Var(\hat{Y}) = \sum_s Var(\hat{Y}_s) = \sum_s \sum_t \sum_j Var(\hat{Y}_{stj})$$

$$Var(\hat{Y}_{stj}) = N_{st}^2 \left( \frac{1}{n_{stj}} - \frac{1}{N_{st}} \right) \left( \frac{1}{(n_{stj}-1)} \right) \sum_{i=1}^{n_{stj}} (H_{stij} \times D_{1sti} \times \bar{y}_{stij} - \frac{1}{n_{stj}} \sum_{i=1}^{n_{stj}} H_{stij} \times D_{1sti} \times \bar{y}_{stij})^2 + \frac{N_{st}}{n_{stj}} \sum_{i=1}^{n_{stj}} H_{stij}^2 \times D_{1sti}^2 \left( \frac{1}{h_{stij}} - \frac{1}{H_{stij} \times D_{1si}} \right) s_{wij}^2$$

$$\text{where, } s_{wij}^2 = \frac{1}{(h_{stij}-1)} \sum_{k=1}^{h_{stij}} (y_{stijk} - \bar{y}_{stij})^2$$

##### (b) Formula for ratio $\hat{R}$ (for Rural/Urban):

Note that  $X^2MSE(\widehat{R})$  is unbiasedly estimated by  $V(\hat{Y} - R\hat{X})$

$$V(\hat{Y} - R\hat{X}) = v(\hat{u}) \text{ where } u_{ijk} = (y_{ijk} - R x_{ijk}),$$

$U_i = (Y_i - R X_i)$  and  $U = (Y - RX) = 0$  at domain level (State/District).

$$\widehat{X^2MSE}(\hat{R}) = \widehat{V}(\widehat{U}) \text{ at } R = \hat{R}$$

$$\hat{Y}_{stij} = \frac{1}{N_{st}} \sum_k y_{stijk} \times n_{stj} \times \text{multiplier}$$

$$\hat{X}_{stij} = \frac{1}{N_{st}} \sum_k x_{stijk} \times n_{stj} \times \text{multiplier}$$

$$MSE(\hat{R}) = \frac{1}{\hat{X}^2} \sum_s \sum_t MSE_{st}(\hat{R})$$

Finally;

$$\hat{MSE}_{st}(\hat{R}) = \sum_j N_{st}^2 \left( \frac{1}{n_{stj}} - \frac{1}{N_{st}} \right) \frac{1}{(n_{stj} - 1)} \sum_{i=1}^{n_{stj}} (H_{ij} \times D_{1si} \times \bar{u}_{ij} - \frac{1}{n_{stj}} \sum_{i=1}^{n_{stj}} H_{ij} \times D_{1si} \times \bar{u}_{ij})^2 + \sum_j \frac{N_{st}}{n_{stj}} \sum_{i=1}^{n_{stj}} H_{ij}^2 \times D_{1si}^2 \left( \frac{1}{h_{ij}} - \frac{1}{H_{ij} \times D_{1si}} \right) s_{uij}^2$$

where,  $s_{uij}^2 = \frac{1}{(h_{ij} - 1)} \sum_{k=1}^{h_{ij}} (u_{ijk} - \bar{u}_{ij})^2$

$$\bar{u}_{ij} = \bar{y}_{ij} - \hat{R}\bar{x}_{ij}$$

Multiplier formulae are as given in Section 4.

### 3.6.2 Estimates of Relative Standard Error (RSE):

$$RSE(\hat{Y}) = \frac{\sqrt{Var(\hat{Y})}}{\hat{Y}} \times 100$$

$$RSE(\hat{R}) = \frac{\sqrt{\hat{MSE}(\hat{R})}}{\hat{R}} \times 100$$

### 4.0 Multipliers:

4.1 The formulae for multipliers at stratum/sub-stratum/second-stage stratum level for a Questionnaire type are given below.

Schedule	sector	formula for multipliers
OOCM	Rural/urban	$\frac{N_{st}}{n_{st}}$
CAMS: 2022-23	Rural/urban	$\frac{N_{st}}{n_{stj}} \times D_1 \times \frac{H_{stij}}{h_{stij}}$
		$j = 1, 2$

#### Note:

- (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable may be used.
- (ii) Multipliers have to be computed on the basis of information available in the listing Schedule OOCM irrespective of any misclassification observed between the listing Schedule and detailed enquiry Schedule.

## **Appendix C: Survey Design and Estimation Procedure**

### **5.0 Treatment for zero cases, casualty cases etc.:**

5.1 While counting the number of FSUs surveyed ( $n_{st}$  or  $n_{stj}$ ) in a stratum/sub-stratum, all the FSUs with survey codes 1 to 6 in listing Schedule 00CM are considered. In addition, if no household is available in the frame, then also that FSU is treated as surveyed. However, households are available in the frame of the FSU, but none of these could be surveyed, then that FSU is treated as a casualty and not as surveyed.

5.2 *Casualty cases*: FSUs with survey code 7 as per listing Schedule 00CM are treated as casualties. In addition to this, an FSU, although surveyed, may have to be treated as casualty for a particular schedule type and a particular *second stage stratum* as given in the following para:

5.2.1 FSUs with survey codes 1 or 4 as per listing Schedule 00CM having number of households in the frame of j-th second stage stratum greater than 0 (i.e.,  $H > 0$ ) but number of households surveyed according to data file as nil ( $h = 0$ ), are considered as casualties for j-th second stage stratum.

*All the FSUs with survey codes 1 to 6 as per listing Schedule 00CM minus the number of casualties as identified above are considered as the number of surveyed FSUs ( $n_{stj}$ ) for that (stratum/sub-stratum)  $\times$  (second stage stratum).*

**Table 1: Allocation of Sample FSUs for survey on CAMS**

State/UT	Central			State		
	Rural	Urban	Total	Rural	Urban	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Andhra Pradesh	260	168	428	260	168	428

### ***Facsimile of CAMS 2022-23 Schedule***

***Appendix D: Facsimile of CAMS 2022-23 Schedule***

**GOVERNMENT OF INDIA  
 NATIONAL STATISTICAL OFFICE  
 SOCIO-ECONOMIC SURVEY  
 SEVENTY NINTH ROUND  
 SCHEDULE CAMS 2022-23: COMPREHENSIVE ANNUAL MODULAR SURVEY 2022-23**

**[Block 1] Identification of sample household**

[Information on items 1 to 8 and 11 will be available from the sample list. Information on items 12, 12.1 and 13 will be available from the schedule for listing (Sch 0.0). Items 14 and 15 are to be filled by the field officials.]

<b>Q no.</b>	<b>Question description</b>	<b>Code/Entry</b>
1.	Sector ( <i>rural-1, urban -2</i> )	
2.	Type of Sample ( <i>central -1, state -2</i> )	
3.	State/U.T. Name	
4.	District Name	
5.	Name of Sub-District/Tehsil/Town	
6.	Village Name:	
7.	Investigator Unit Number/Block Number:	
8.	Sample Sub-Unit (SU) Number:	
9.	Round Number:	79
10.	Schedule name:	CAMS 2022-23
11.	Serial Number of Sample FSU:	
12.	Sample Sub-Division Number:	
12.1	Second-stage stratum number:	
13.	Sample Household Number:	
14.	Survey Code ( <i>original -1, substitute -2, casualty -3</i> )	
<b>FOR CODES 2 or 3 in Q14, GO TO Q 15. OTHERWISE GO TO BLOCK 3.1.</b>		
15.	Reason for substitution/casualty of the original household  ( <i>informant busy -1, members away from home -2, informant non-cooperative -3, others -9</i> )  ( <i>The interviewer will fill up this item if a substituted household is canvassed or the household is a casualty</i> )	

## *Appendix D: Facsimile of CAMS 2022-23 Schedule*

**[Block 3.1] Remarks**

**Notes for filling up Block 3.1:**

1. Col 2: As per usual practice of NSS, name of the household members will start from the name of the head of household followed by spouse of the head and the next their children. If the household has any non-relatives, then their name will be listed at the end.
2. Col 7:
  - a. **Enrolment would cover** education acquired through formal pre-school, school, college, university, institutions, ITIs, vocational/ technical training institutes, special schools for children with special needs, etc. Formal education covers general, technical, professional, vocational courses offered by schools, colleges, universities, open schools, open and distance education universities, CA/ CFA/ ICWA/ CS or similar professional bodies or other institutions. Enrolment includes enrolment in kindergarten (upper and lower), nursery, pre-primary school, Early Childhood Care and Education (ECCE) of Aanganwadi etc.
  - b. **Enrolment would not cover**
    - i. Education acquired through play schools or any Government run literacy programmes e.g., Non-Formal Education Centres/Total Literacy Campaign/Adult Education Centres and similar programmes run by NGOs,
    - ii. Gaining knowledge from master craftsmen, motor repairing shops, parents/ relatives who work in agriculture, tailoring, pottery, cobbler, carpenter, etc; work-based training given at offices.
3. For filling the Col 11, ‘indebtedness’ of at least cash amount of Rs 500/- is to be considered.

## Appendix D: Facsimile of CAMS 2022-23 Schedule

<b>[Block 3.2] Usage of mobile, computer etc. particulars of household members of age 3 years or more</b>										
[Information will be collected in this block for household members of age 3 years and more [i.e. entry (col. 5) $\geq$ 3]. Entries in col. 1 and col. 2 are to be auto-populated/copied from corresponding entries of Block 3.1]										
Auto-populated/ Copied from Block 3.1	Whether able to use mobile telephone?  (yes: smart phone-1 yes: mobile telephone excluding smart phone -2, no -3)	For code 1, 2 in col. 3	For code 1, 2, 3 in col. 4	Whether able to use any of:	<b>For codes 1,2 in col. 3 or 1 in col.6</b>					
					<b>For codes 1,2,3 in col. 7</b>					
Srl. No. (as in col. 1, bl. 3.1)	Age (as in col. 5, bl. 3.1)	Whether uses any mobile telephone (including smart phone) with active sim card for the <b>last three months</b> for making personal calls and/or to access the internet?  (yes: exclusive use -1, yes: shared with household member(s) -2, yes: shared with non-household member(s) -3, no - 4)	What is the type of mobile technology mainly used?  (5G and above-1, 4G-2, 3G-3, 2G-4, others-5, don't know-9)  [In case of more than one code, the code appearing first in the code list is to be reported.]	desktop computer/laptop/tablet/palmtop/notebook etc.?  (yes -1, no -2)	Whether able to use internet with/via mobile telephone/ smart phone/ desktop computer/laptop/tablet/palmtop/notebook etc. for any purposes?  (yes: for entertainment purpose (including communication) only-1, yes: for information purpose only -2, yes: both for entertainment (including communication) and information purpose -3, no-4)	Whether used internet at least once during last 3 months  (yes-1, no-2)	For code 2 in col. 8	Whether used internet at least once during last 12 months  (yes-1, no-2)	Whether able to send or receive emails?  (yes -1, no -2)	Whether able to use any of: mobile phone/smart phone/desktop computer/laptop/tablet/palmtop/notebook etc.for performing banking transaction like digital payment?  (yes -1, no -2)

## *Appendix D: Facsimile of CAMS 2022-23 Schedule*

**[Block 3.3] ICT particulars of household members of age 15 years or above who can use smart phone/ desktop computer/laptop/tablet/palmtop/notebook etc.**

[For household members with age 15 years or more [i.e. with entry 15 or more in col. 2 of Block 3.2] who can use smart phone/ desktop computer/laptop/tablet/palmtop/notebook etc. [i.e. with entry 1 in col. 3 or entry 1 in col. 6 of Block 3.2]; the Block 3.3 will be generated/filled-in. Entries in col. 1 and col. 2 are to be auto-populated/copied from corresponding entries of Block 3.2]

## Appendix D: Facsimile of CAMS 2022-23 Schedule

<b>[Block 4.1]General household characteristics</b>		
Qs. No.	Question description	Code/Entry
(1)	(2)	(3)
1.	Household size	
2.	Religion <i>(Hinduism -1, Islam -2, Christianity -3, Sikhism -4, Jainism -5, Buddhism -6, Zoroastrianism -7, others -9)</i>	
3.	Social group <i>(scheduled tribe(ST) -1, scheduled caste(SC) -2, other backward class (OBC)-3,others-9)</i>	
4.	Language mainly spoken at home <i>(Assamese-01, Bengali-02, Gujrati-03, Hindi-04, Kannada-05, Kashmire-06, Konkani-07, Malayalam-08, Manipuri-09, Marathi-10, Nepali-11,Odia-12, Punjabi-13, Sanskrit-14, Sindhi-15, Tamil-16, Telugu-17, Urdu-18, English-19, Bodo-20, Dogri-22, Khasi-23, Garo-24, Mizo-25, Bhutia-26, Lepcha-27, Limboo-28, French-29, Santhali-39, Maithali-51, Other Languages-99)</i> Notes: <i>(i) Language mainly spoken by majority of household members is to be considered. (ii) In case equal number of household members is speaking in two or more different languages, the language spoken by the head of household is to be reported.</i>	
<b>A. Drinking water facilities</b>		
5.	Source of drinking water from which most of the drinking water is obtained by the household during last 365 days i.e. Principal source of drinking water <i>(bottled water-01, piped water into dwelling-02, piped water to yard/plot-03, piped water from neighbour-04, public tap/standpipe-05, tube well-06, hand pump-07, well: protected-08, unprotected-09; tanker-truck: public-10, private-11; spring: protected-12, unprotected-13; rainwater collection -14, surface water: tank/pond-15, other surface water (river, dam, stream, canal, lake, etc.)-16; others (cart with small tank or drum, etc)-19)</i>	
6.	Is availability of drinking water from the principal source sufficient throughout the year (i.e. during each calendar month of the last 12 months)? (yes-1, no -2)	
7.	Type of access to the principal source of drinking water <i>(exclusive use of household- 1, common use of households in the building -2, neighbour's source- 3, community use- 4; others- 9)</i>	
8.	Distance to the principal source of drinking water <i>(within dwelling -1, outside dwelling but within the premises -2, outside premises- 3)</i>	
9.	Method used by the household for treatment of drinking water received from principal source <i>(not required to treat the drinking water as household received or perceived to receive safe drinking water - 1, treated: electric purifier - 2, non-electric purifier - 3, boiling - 4, chemically treated with alum - 5, chemically treated with bleach/chlorine tablets - 6, filtered with cloth - 7, others - 9; not treated -8)</i>	
<b>B. Sanitation facilities</b>		
10.	Type of access of the household to latrine <i>(An infrastructure which allows safer and more hygienic disposal of human excreta)</i>	

**Appendix D: Facsimile of CAMS 2022-23 Schedule**

[Block 4.1]General household characteristics		
Qs. No.	Question description	Code/Entry
(1)	(2) <i>(exclusive use of household-1, common use of households in the building -2,public/community use of latrine -3, others -9, no access to latrine-4)</i> <b>FOR CODES 1 TO 3 OR 9,GO TO Q11.</b> <b>FOR CODE 4,GO TO Q12.</b>	(3)
11.	Type of latrine in which the household has access <i>(flush/pour-flush to: piped sewer system-01, septic tank-02, twin leach pit -03, single leach pit -04, elsewhere (open drain, open pit, open field, etc)-05; ventilated improved pit latrine-06, pit latrine with slab-07, pit latrine without slab/open pit-08, composting latrine-10, open drain/nallah-11, others-19)</i>	
11.1	<b>FOR CODE 1 IN Q10 AND CODES 02 - 04, 06, 07, 10 IN Q11,</b> Whether excreta from septic tank/pit/composting latrine have ever been emptied? (yes - 1, no - 2, not known - 3)	
11.2	<b>FOR CODE 1 IN Q11.1,</b> Place of disposal of excreta last time <i>(treatment plant - 1, buried in covered twin leach pit/single pit - 2, uncovered pit/open land/pond/river etc. - 3, other places - 9, not known - 4)</i>	
11.3	<b>FOR CODE 1 IN Q11.1,</b> How frequently excreta is emptied? <i>(once or more in a year - 1, once in 2 years - 2, once in 5 years - 3, once in 10 years - 4, others - 9, not known - 5)</i>	
12.	Is hand washing facility available within the household premises? <i>(yes: with water and soap/detergent - 1, with water and ash/mud/sand etc.- 2, with water only - 3; no - 4)</i>	
<b>C. Energy used by household for cooking, lighting, heating</b>		
13.	What is the primary source of energy used by the household for cooking? <i>(firewood, chips &amp; crop residue - 01, LPG - 02, other natural gas - 03, dung cake - 04, kerosene - 05, coke, coal - 06, gobar gas - 07, other biogas - 08, charcoal - 09, electricity (incl. generated by solar /wind power generators) - 10, solar cooker - 11, others - 19, no cooking arrangement - 12)</i>	
14.	What is the primary source of energy used by the household for lighting? <i>(electricity (incl. generated by solar /wind power generators) - 1, kerosene - 2, other oil - 3, gas - 4, candle - 5, others - 9, no lighting arrangement - 6)</i>	
15.	What is the primary source of energy used by the household for heating? <i>(firewood, chips &amp; crop residue - 01, LPG - 02, other natural gas - 03, dung cake - 04, kerosene - 05, coke, coal - 06, gobar gas - 07, other biogas - 08, charcoal - 09, electricity (incl. generated by solar /wind power generators) - 10, solar cooker - 11, others - 19, no heating arrangement - 12)</i>	
16.	<b>FOR CODE 10 IN Q13 AND/OR CODE 1 IN Q14 AND/OR CODE 10 IN Q15, SKIP THIS QUESTION</b> Is electricity used by the household for any of cooking/lighting/heating? <i>(yes-1, no-2)</i>	
<b>D. Other facilities</b>		

**Appendix D: Facsimile of CAMS 2022-23 Schedule**

<b>[Block 4.1]General household characteristics</b>		
<b>Qs. No.</b>	<b>Question description</b>	<b>Code/Entry</b>
<b>(1)</b>	<b>(2)</b>	<b>(3)</b>
17.	<b>FOR RURAL SAMPLES ONLY,</b>  Whether an all-weather road (i.e. usable during all seasons) is within a distance of 2 km from the place of living of the household ( <i>yes-1, no-2</i> )	
18.	<b>FOR URBAN SAMPLES ONLY,</b>  Whether the nearest low capacity public transport system (e.g. bus, car, taxi, auto, rickshaw etc.) stop is within a walkable distance of 0.5 km from the place of living of the household ( <i>yes-1, no-2</i> )	
19.	<b>FOR URBAN SAMPLES ONLY,</b>  Whether the nearest high capacity public transport system (e.g. train, metro, ferry etc.) stop is within a walkable distance of 1 km from the place of living of the household ( <i>yes-1, no-2</i> )	
20.	<b>FOR URBAN SAMPLES ONLY,</b>  Distance to nearest open public space (like <i>Parks, Playgrounds, Riverfronts, Lakes, Public beaches, Squares etc.</i> ) from the place of living of the household  <i>(less than or equal to 500 mtrs -1, greater than 500 mtrs but less than or equal to 2 kms -2, more than 2 kms -3, not known -9)</i>	
<b>[Block 4.1] Remarks</b>
